MULTIMEDIA
MANUAL

PROTON
INSPIRING CONNECTIONS

PROTON X90

INTELLIGENCE
THAT EMPOWERS™

Foreword

Dear users:

Thank you for using our product. Before operating the device, please read this manual carefully to help you understand the proper methods when operating this device for safe use and better entertainment experience!

Please read this manual in detail before you start operating this multimedia unit and navigation device. Perusahaan Otomobil Nasional Sdn. Bhd. reserves the right of final interpretation of this manual.

Important safety considerations:

1. The drivers are prohibited from watching programs and operating the device while driving to avoid traffic violations and accidents.
2. Do not disassemble or repair the device without permission to avoid damaging the device and accidents.
3. Since the device is subject to upgrade, this manual may have discrepancies from the actual operations. Please operate as per the actual conditions.
4. The operating voltage of this device is 9V ~ 16V. The device will restart for self protection when the battery voltage is low.

Note : Multimedia function may differ based on country.

If you have any questions, kindly contact or visit our website as mentioned to locate the nearest dealer and other available services.

Operation Instructions

Notice to Users

- Do not use mobile phone while driving. Park the vehicle in a safe place first if you need to use the mobile phone.
- The use of navigation system does not mean that the responsibilities of driver can be replaced. Observe and oblige to traffic rules. Pay attention to the current traffic condition consistently.
- If there is a difference in the traffic regulations and the current traffic condition always take precedence over the navigation system.
- For safety reasons, only operate the navigation system menu before driving or when the vehicle is stationary.
- In case there is only one road or the road is damaged or closed from vehicle entry (e.g. pedestrian street), the navigation system may give a warning. Pay close attention to the warning given.
- The navigation system will not consider route safety when planning a route. Roadblocks, locations of buildings, height and weight limits, traffic and weather conditions or other issues that can affect the safety and driving time will also not be considered in the proposed route. Therefore, it is up to the driver to decide which route is the most suitable route.
- The speed limit stipulated by current road traffic regulations should be more reliable than the system storage most of the time. There is no guarantee that the speed limit shown by the navigation system is the same as that stipulated by the traffic law under any circumstances.
- Do not solely rely on the navigation system to find emergency services (e.g. hospitals, fire-fighting facilities, etc). There is no guarantee that all nearby emergency services in the database are up to date. In this case, driver judgement is required in event of emergency.

It is not recommended to use the navigation system when the engine is turned off.

If this is done, the battery may lose power or drain to flat condition. Always keep the engine running when using the navigation system.

Do not disassemble or modify this device. Otherwise, it may result to accidents, fire and electric shock.

Laws in some provinces and cities prohibit drivers from watching videos during driving. Use the system carefully. ◀

Safety Information

This Manual provides relevant information of all models. Due to the variety of configurations, the descriptions in this manual may differ from the actual configuration of your vehicle. Your actual vehicle shall prevail.

Warning

Ignoring the warning may cause serious injury or death. The stated instructions or requirements must be strictly followed. ◀

Caution

Instructions and requirements stated in the caution must be strictly observed. Otherwise, your vehicle might be damaged.◀

Description

Indicative descriptions for better understanding on some information about the use of this vehicle. ◀

Environmental Protection

It indicates that a statement made here is related to environmental protection.◀

Asterisk

An asterisk “ * ” symbol appearing after the title or name indicates that the configuration or function described is only available in certain models and not necessarily in this vehicle.

Graphics

Indicates a descriptive object.

Indicates the movement direction of an object.

Indicates the rotation direction of an object.

Indicates that this action is prohibited or this situation must not occur.

Disclaimers

This Manual has been written in compliance with such laws and regulations currently in force. PROTON reserves the right to make such amendments and/or revisions to this Manual as and when required.

This Manual is a copyright owned by PROTON. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior written permission from PROTON.

All the data contained in the manual are the latest data at the time this manual is published.

The pictures in this manual are for reference purpose only. PROTON reserves the right of final interpretation of this manual.

When transferring the vehicle, please remember to pass this manual on to the new user as this manual is an integral part of the vehicle. ◀

This multimedia manual is available at Proton official website, together with the owner's manuals for this model. Refer to QR code provided at the back cover of this manual. ◀

PROTON has the right not to provide the service for you in the following cases:

- Violation of local laws and regulations.
- Provision of false registration information.
- Unauthorized use of services.
- Application of products and services for any illegal purposes.
- Behaviors which harm to the interests of other users.
- Abuse of user rights.
- Behaviors violating social customs and social morality.
- Acts inciting national hatred and discrimination, as well as undermining national unity.
- Acts of spreading obscenity, pornography, gambling, violence, murder, terrorism or abetting crime.
- Acts harming national security, divulging state secrets, subverting state power and undermining national unity.

After correction, PROTON has the right to decide whether to resume the service on the case to case basis.

Notes Before Using Bluetooth

Description of The Wireless Bluetooth Technology

- Wireless Bluetooth technology is based on short-range wireless network technology, which enables different devices to connect in short range at a frequency of 2402 MHz ~ 2480 MHz.
- It supports various electronic devices such as computer, external devices, Bluetooth phones, and PDAs. With regard to application in vehicles, wireless Bluetooth technology can achieve high-speed transmission without using a cable.
- Bluetooth phone means that the user can conveniently make a phone call via Bluetooth connection.
- Some phones may not be supported by the function of Bluetooth phone.

Notices for Safe Driving

- Bluetooth phone can improve the safety of driving. After the phone is connected via Bluetooth function to the system unit, the user can conveniently make a call, answer a call and manage the contact.
- Please read this user manual carefully before using the Bluetooth phone.
- It is prohibited to operate the Bluetooth device frequently while driving. This may cause negligent driving that can result in an accident.
- Avoid looking at the screen for long periods while driving. This is dangerous and may cause an accident.

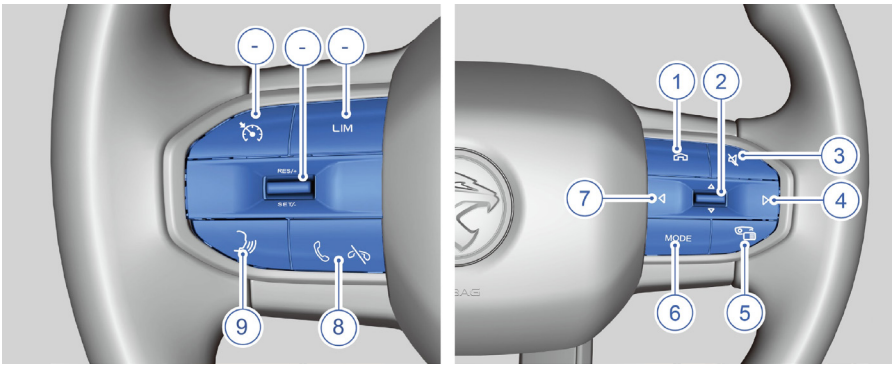

Reminder for Pairing Bluetooth Phone

- Before pairing your phone to the multimedia system unit, check to see if your phone is equipped with a Bluetooth function.
- If you do not want your vehicle to be automatically Bluetooth connected to your phone, stop the vehicle and deactivate the Bluetooth function in the phone.
- Some Bluetooth functions may not be activated properly due to the software version of the phone. Disconnect the current Bluetooth connection and update your phone with the latest software version provided by the phone manufacturer. Once completed, pair your phone with the system unit again.

Devices And Operation

Steering Wheel Control Buttons

The steering wheel control buttons for multimedia unit is located on the left and right side (***Multi-control Function Buttons***) of the steering wheel. The functions mentioned below for multi-control function buttons on the right side of steering wheel are during the meter instrument is closed via Mode switch button (the button is currently controlling the multimedia unit).

No.	Buttons	Short Press	Long Press
1	Home button	Press this button briefly to return to the previous menu or interface.	-
2	Selection and Confirmation button (volume up/ down)	Move this button up or down to adjust (increase or decrease) the audio source volume from the multimedia unit. Press this button to hide regular alert messages or pause the playback of audio source from the multimedia unit.	Move this button up or down to continuously increase or decrease the audio source volume from multimedia unit.

No.	Buttons	Short Press	Long Press
3	Mute button	Short press to mute or unmute the audio source.	-

9	Voice button* (Phone call)	Press this button to use voice recognition mode function during phone call (if equipped).	

Touchscreen Operation

No.	Finger Gestures	Action
1		***Tap :*** Activate an application, activate button functions and locate the progress bar
2		***Horizontal scroll or swipe :*** Move or drag a page to the left or right
3		***Double tap with one finger :*** to enter the interface or apps
4		***Squeeze inwards :*** squeeze using two fingers inwards to zoom in
5		***Squeeze outwards :*** squeeze using two fingers outwards to zoom out

Basic Operation

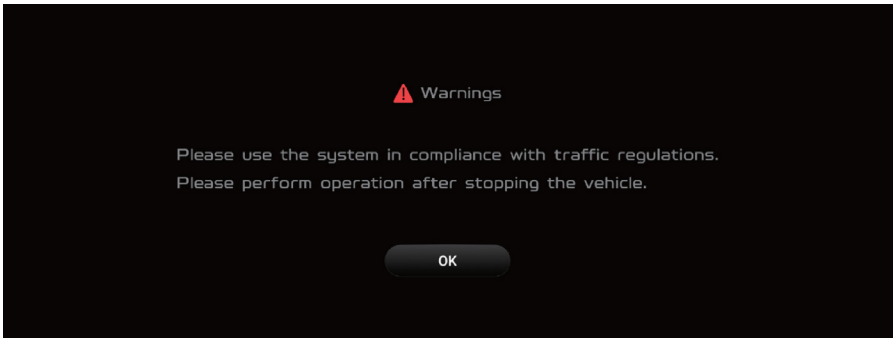

System Start-up

When the power of the system is OFF, turn the ignition to ACC or ON position and the multimedia system will start automatically. A start-up image and a warning message will pop up on the multimedia screen.

Start-up Image

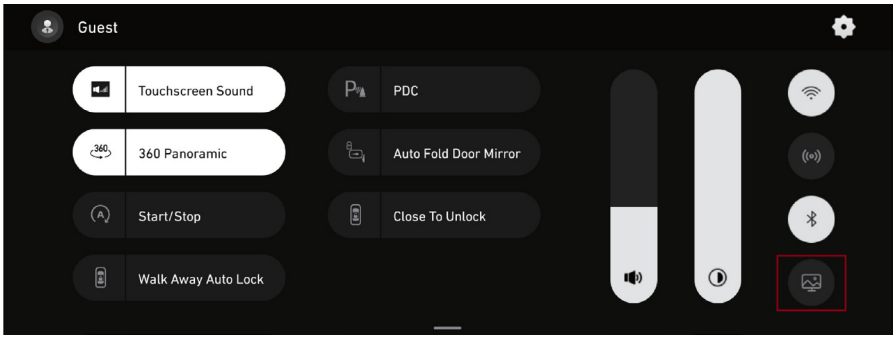

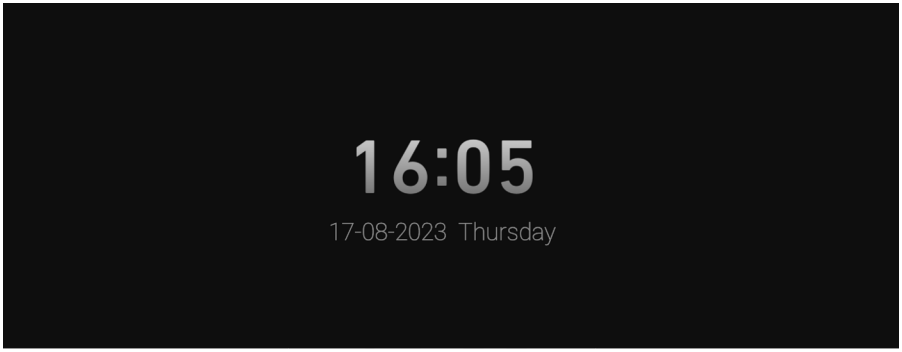

Warning Image

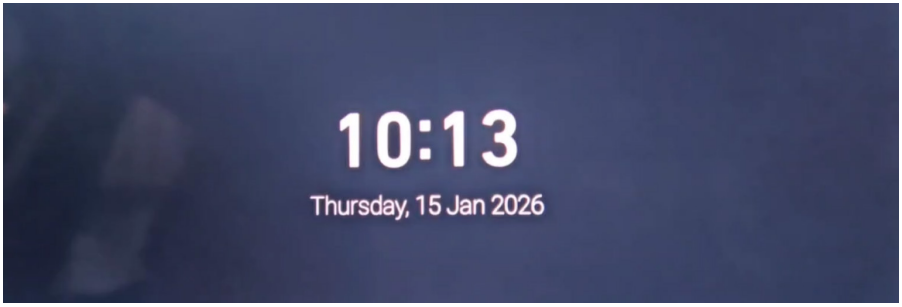

Screensaver (Lock Screen)

- Tap the ***Screensaver*** icon at the the pull-down menu to enter the Screensaver or lock screen interface.
- Tap on any area of the interface or long/short press the Power button to unlock (exit) the screensaver interface.

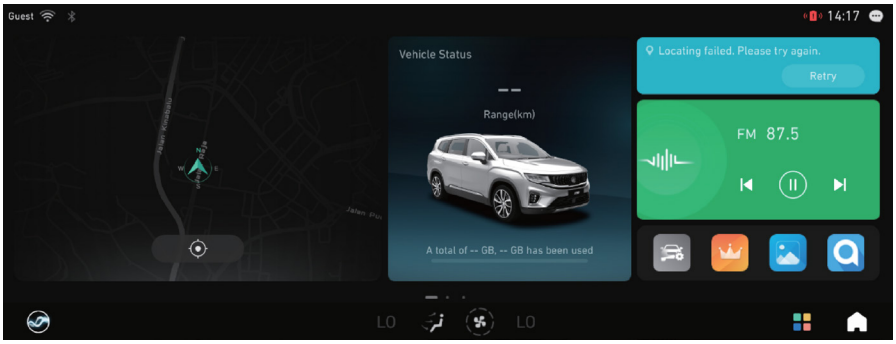

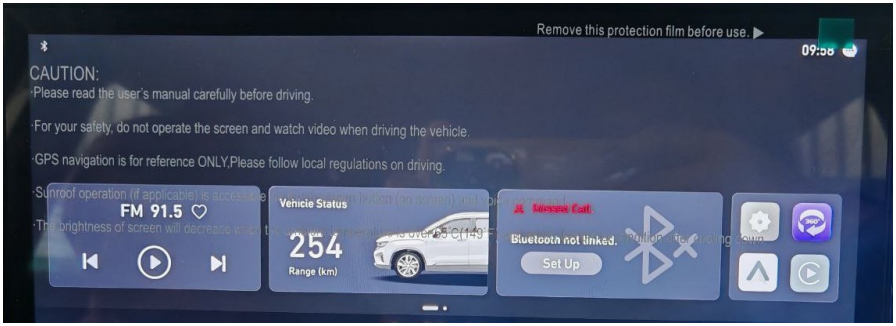

Homepage (Home Screen)

The home screen is designed to give experience similar to that of Android devices.

Certain widgets such as navigation widget and weather widget may not be available in your multimedia unit. Refer to your vehicle for actual configuration. ◀

- **Map (Navigation) widget* :** Map or navigation widget is based on map status which are before navigation and navigation in progress. Tap on the widget to open Navigation app (if equipped).
- **Vehicle Status widget :** this widget displays endurance mileage, vehicle colour and remaining (or total) data.
- **Weather widget* :** displays the current located city, real-time weather icon, temperature, weather info and wind direction (if equipped)
- **Recent used apps widget :** displays most 4 recently used functions starting from left to right. Default location is on lower right of the homepage screen.

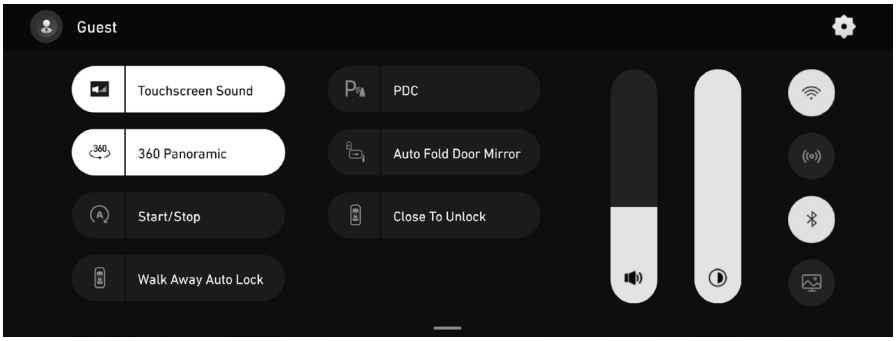

Recent used apps widget will display default functions (apps) during its first used, current function is displayed on the far left and other functions will display to the right in turn, recording the last four to eight recent used apps interface. ◀

Widget Editing Screen

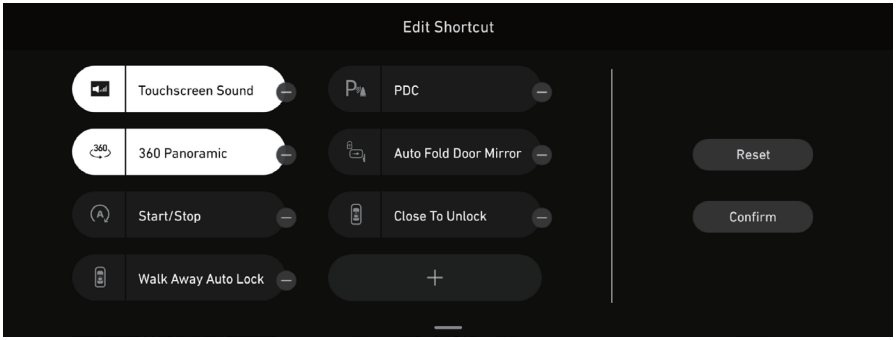

- Long press any widget or apps to enter edit mode. In this mode, user can add, edit and remove the widgets, apps and shortcuts based on user preference.
- Tap " **+** " to add widgets or apps, and tap " **-** " to remove existing ones.
- This function support the tap-and-drag movement in editing mode for easy arrangement.

Pull-down Menu

Swipe down from the top of the multimedia screen display to show the pull-down menu. All functions can be switched on/off quickly including quick configure to Wi-Fi, Bluetooth, Hotspot, Screensaver, vehicle settings, screen brightness and volume adjustment.

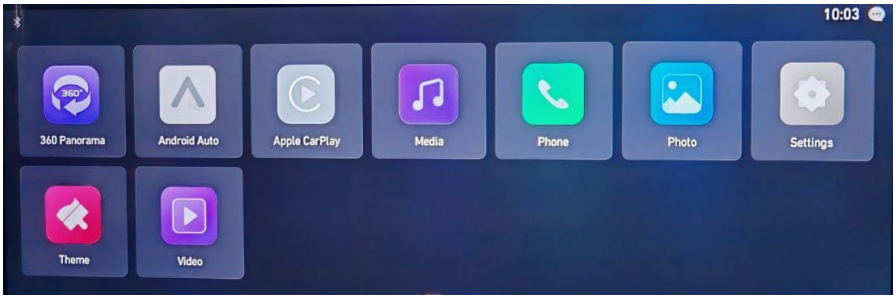

Long press any shortcut icons to add/delete the shortcuts to/from the pull-down menu.
Tap " **+** " to add a shortcut function.
Tap " **x** " to delete a shortcut function.

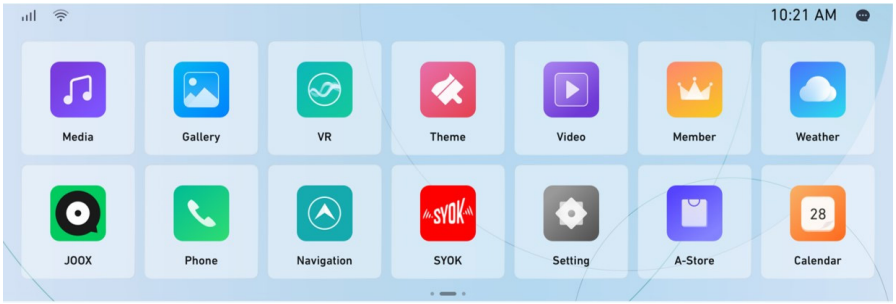

Tap **Confirm** button on the right side of the screen to confirm the current configuration.

Apps List Interfaces

Tap ***Recent used apps widget*** or or swipe the screen left/right to enter the app list interfaces with selection of apps that may entertain and enhance your driving experience.

Example of applications in apps list interface

Example of applications that may be available

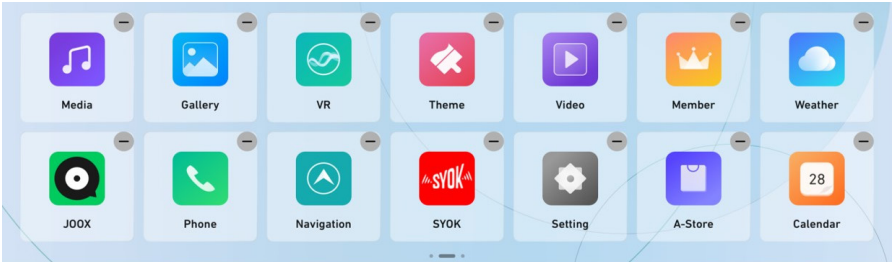

App list interface includes Media, Image and Video Entertainment, Online Navigation, VR (Voice Recognition), Weather and more Apps that meet most driving scenarios.

As the system continually improves over time, more useful apps will be launched in stages. In the app list interface, users can now edit, delete, and re-order the sequence of apps.

Certain apps such as navigation, VR and weather may not be available in your multimedia unit. Refer to your vehicle for actual configuration. ◀

Apps List Edit Mode

New feature in the apps list interface allows users to edit and create folders which will make it easy for user to customize and streamline the app experience.

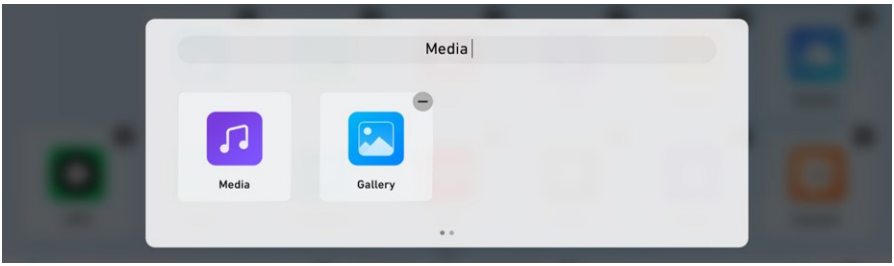

To enter edit mode, long-press any apps icon and drag it to rearrange its position.

Tap “ **-** ” to delete the app.

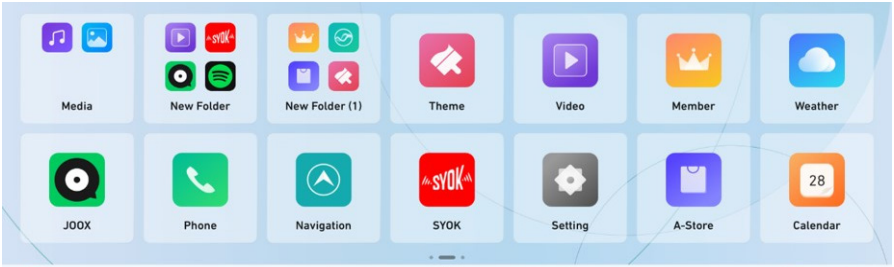

Tap “ **OK** ” to confirm and exit edit mode.

Apps List Folder Creation

Hold and drag one apps icon onto another to create folder. Once a folder is created, tap on the folder to edit its name. Clicking or tap outside the folder area will save the new name automatically.

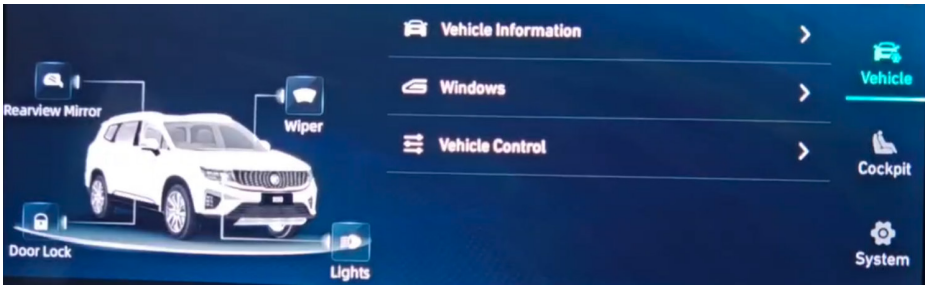

To manage apps within folders, hold and drag any apps icon to move it back to the main App list interface from within the folder. Sample of complete folder as below:

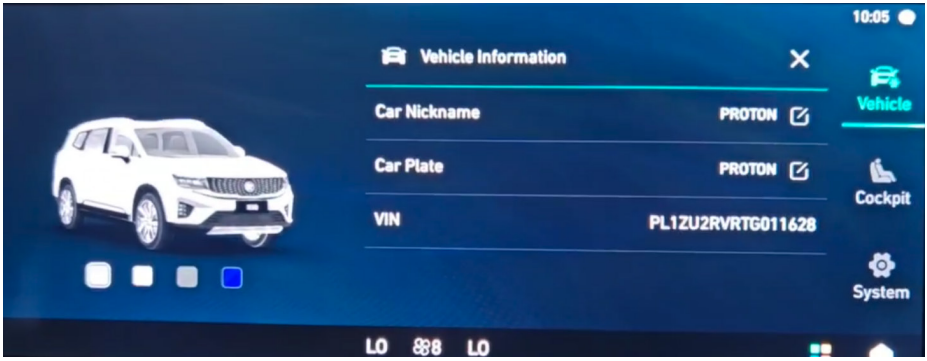

Setting

Tap to open **Setting app**  at homepage or from app list interface to enable/disable, set, and change settings within three categories : Vehicle setting, Cockpit setting and System setting.

Vehicle

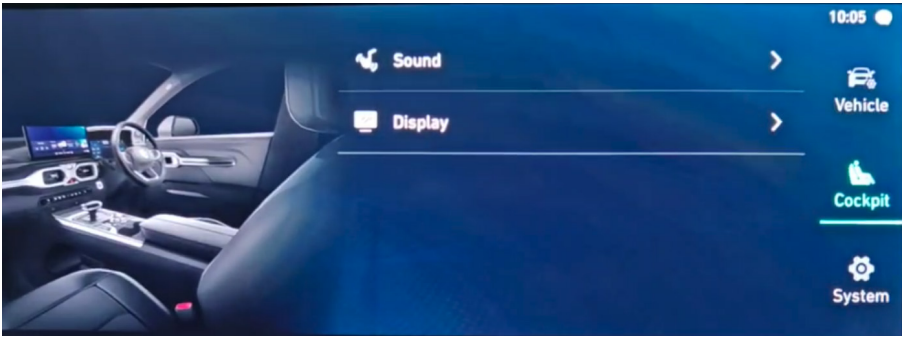

Tap ***Setting*** → ***Vehicle*** → ***Vehicle Information***.

The basic information of the vehicle can be set such as car name and license plate number can be edited except for the VIN.

User can also change the color of the vehicle model at the left side of the interface. Adjustment in color setting will change homepage widget color automatically

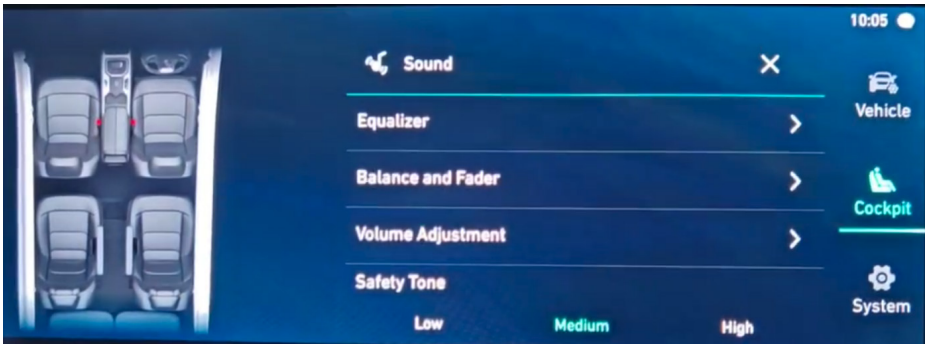

Cockpit

Tap ***Setting*** → ***Cockpit***.
The sound and display can be set.

Sound Setting

Tap ***Setting*** → ***Cockpit*** → ***Sound.***
You can set the sound effect of the complete vehicle:

Equalizer : Control the adjustment of vehicle audio. Selection between PROTON, ROCK, JAZZ, CLASSICAL, POPULAR, VOCALS, CUSTOM.

Balance and Fader : Adjust the sound effect position of the vehicle.

Volume Adjustment : Adjust the Media Volume, Bluetooth Volume, System Volume, Voice Volume.

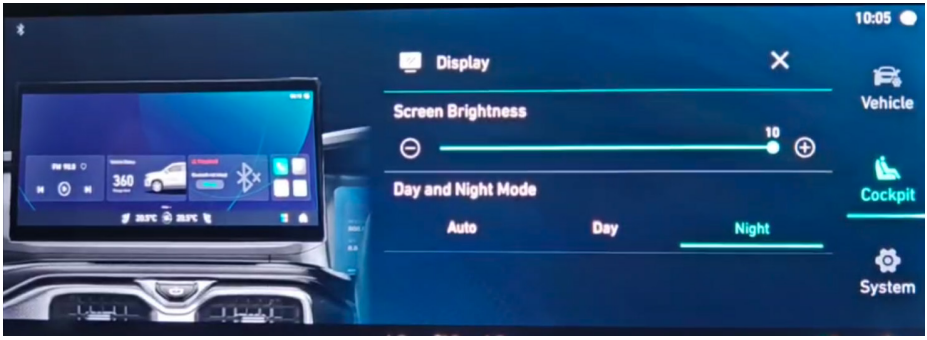

Safety Tone : Select between Low, Medium and High.

Mixing Mode* : Direct Mix / Auto Mix.

Touch screen sound : On/off touch screen sound.

Speed Sensitive Volume : Select between Low, Medium and High.

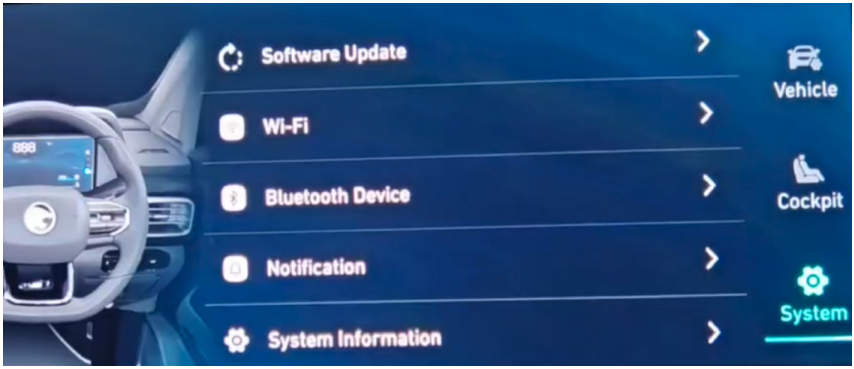

Display Setting

Open ***Setting*** → ***Cockpit*** → ***Display*** in sequence.

- Screen Brightness : adjust display effect, meter and switches brightness between 0 (dark) to 10 (brightest).
- Day and Night Mode : select between Day or Night mode. Select Auto for automatic change between both mode.

System

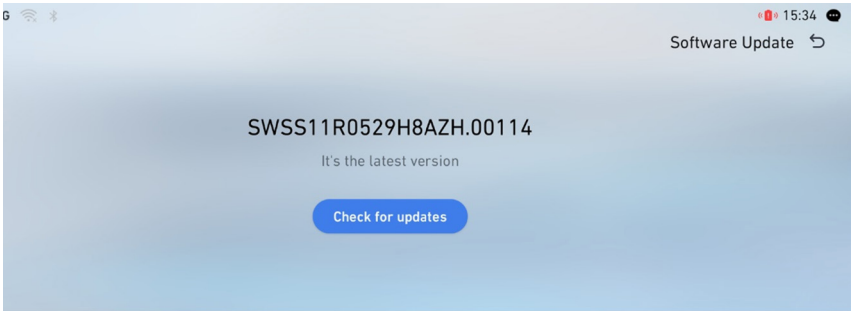

Tap ***Setting*** → ***System*** in sequence.

You can do system settings and information query. Functions include :

Software Update, Wi-Fi, Bluetooth Device, Notification, System Information.

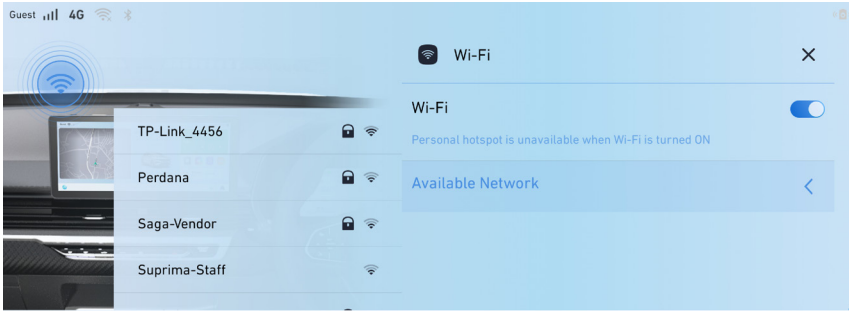

Software Update

Open ***Setting*** → ***System*** → ***Software Update*** in sequence.

The local software can be accessed through the Settings.

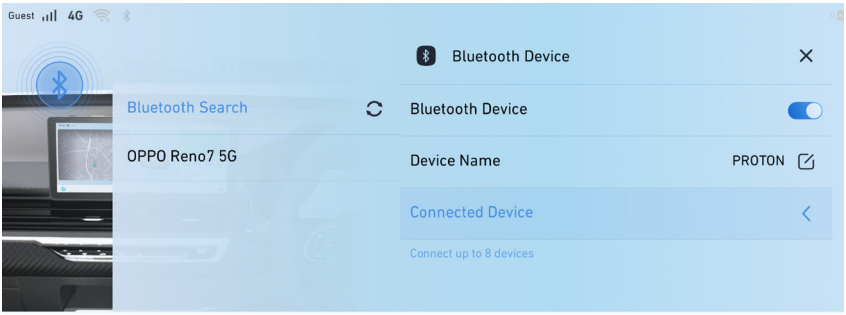

Wireless Network (Wi-Fi)

Open ***Setting*** → ***System*** → ***Wi-Fi*** in sequence.

Control the ON and OFF of the wireless network. After turning on the wireless network, select the corresponding WiFi for connection.

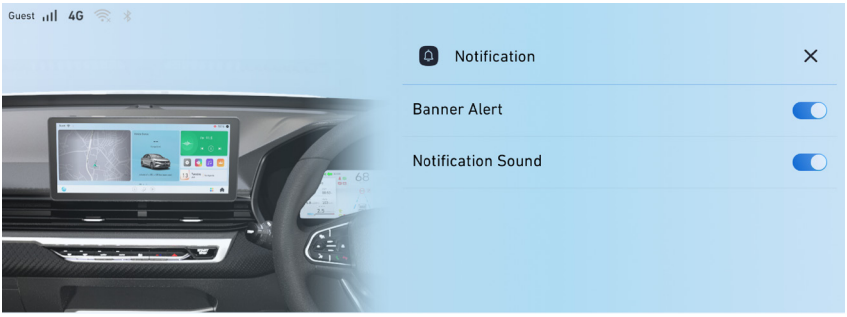

Bluetooth Device

Open ***Setting*** → ***System*** → ***Bluetooth Device*** in turn.

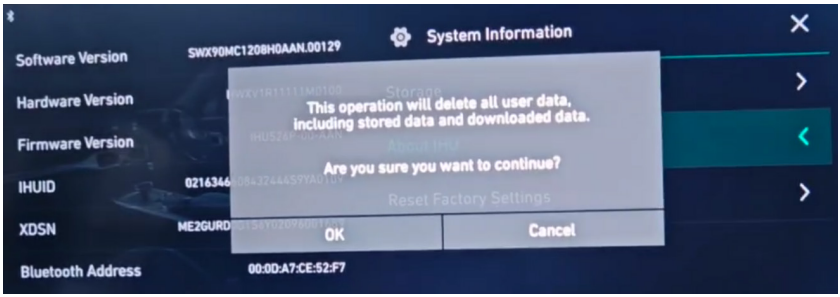

Control the opening and closing of on-board Bluetooth, enable Bluetooth, search for Bluetooth devices, and enable mobile phone Bluetooth to pair. Select your own mobile phone Bluetooth to pair.

Notification

Open ***Setting*** → ***System*** → ***Notification*** in turn.
The settings include flag reminders and sound notifications.

System Information

Open ***Setting*** → ***System*** → ***System Information*** in sequence.

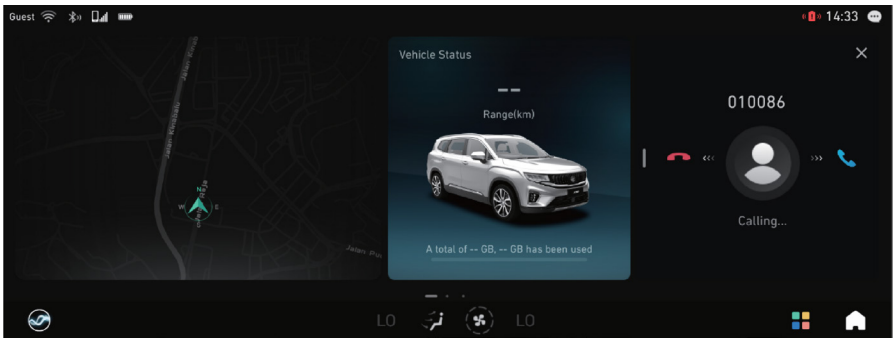

System Message consists of Storage, About IHU, Restore Factory Settings.

Storage contains storage usage information which is categorised by Application, System, Multimedia and Others; Remaining shows the available storage.

About IHU includes the information of software version, hardware version, firmware version, IHUID, XDSN and Bluetooth address, WLAN MAC.

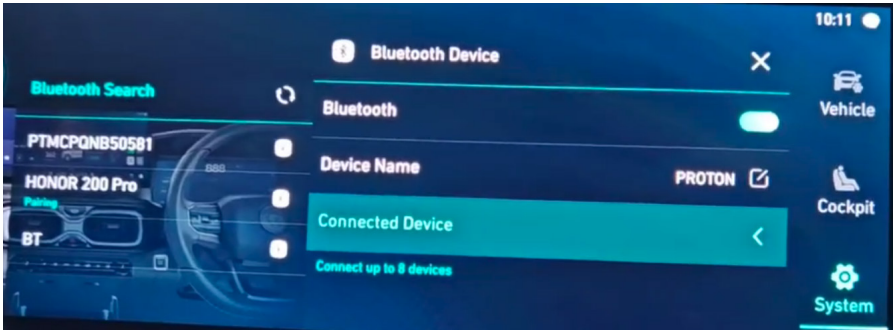

Phone

Tap to open ***Phone app*** at homepage or from app list interface. Before making a call via multimedia unit, it is advised to connect the phone via bluetooth pairing.

Bluetooth Pairing and Connection

Tap **Setting** → **System** → **Bluetooth Device** to enter the Bluetooth interface where user can turn on/off the Bluetooth function and customize Bluetooth information in this interface. See Setting section for details.

Tap ***Bluetooth*** to enable the Bluetooth function in the multimedia unit to start pairing and connecting the bluetooth devices.

Tap ***Available Devices*** to search for available devices to be paired to the multimedia unit. The selected mobile device will receive pairing notification requesting to confirm the pairing process.

- Android – click ***Sync to Contacts*** while connecting.
- iPhones – ensure the ***Sync to Contacts*** function is enabled.

If sync to contact fails, click the device name to unpaired and attempt to reconnect the device again.

Dialing

Various methods of making a call using the multimedia unit are as follows. Tap the name or dial and then tap the phone icon to start dialing:

1. Call via keypad.

2. Call via contacts.

3. Call via recent calls.

4. Call via VR Voice Recognition (if equipped).

   After awakening the VR Voice, calls can be made via the voice command. Refer to Voice Recognition (VR) section for setting and voice commands.

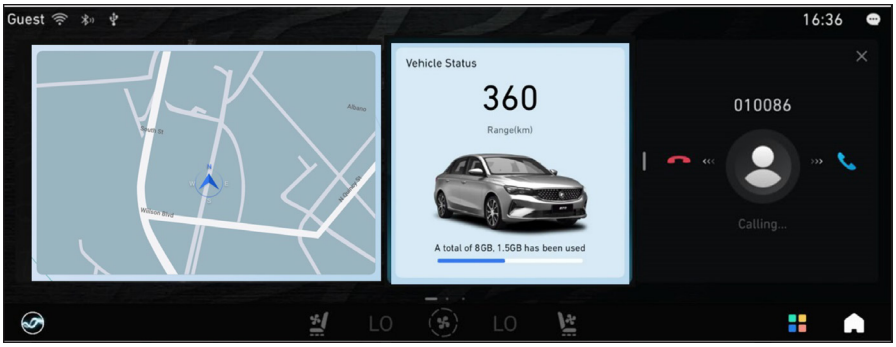

Answering and Hanging Up

Answering and hanging up calls can be done via steering wheel control buttons (the multi-function control buttons at the steering wheel).

While the Bluetooth phone function is active:

- Press Phone button on the steering wheel to answer or hang up the call.
- During the call, adjust the call volume by pressing up/down the volume button.

Tap on to the name or contact number to make bluetooth phone call. You can answer or hang up via multimedia unit on bluetooth phone call interface as below.

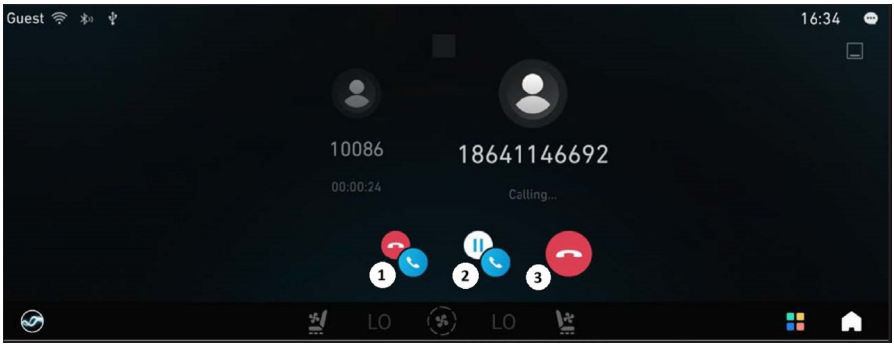

Bluetooth phone call at homepage

Bluetooth phone call interface

Call Status Display: Shows real-time call information, including active calls and any calls placed on hold, for clear and easy call management.

For ***multiple calls***, a display of callers will be shown and you can answer, hold or reject.

1. Hang up first call and answer second incoming call
2. Hold on the call and answer second incoming call
3. Reject the second incoming call

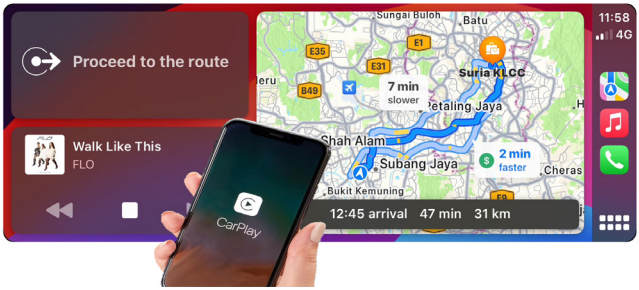

Voice commands can also be used to answer and hang up directly via of voice recognition function (if equipped).

List of common voice command below can be used related to phone system.

Voice Control	Example of Voice Command	Function
Phone	“Make a call.”	Voice control for phone can be used for voice call via bluetooth connected phone and other phone-related queries.
	“Dial ‘Rick’.”	
	“Call ‘112’.”	
	“Call ‘police’.”	
	“Call ‘fire station’.”	
	“Call ‘Yes’.”	
	“Call back.”	
	“Open Bluetooth phone.”	
	“Show contact book.”	
	“Show call log. ”	

Voice commands and their corresponding functions are not limited to the examples as listed in the table. The multimedia unit can interpret other common phrases with clear instructions.

Apple CarPlay*

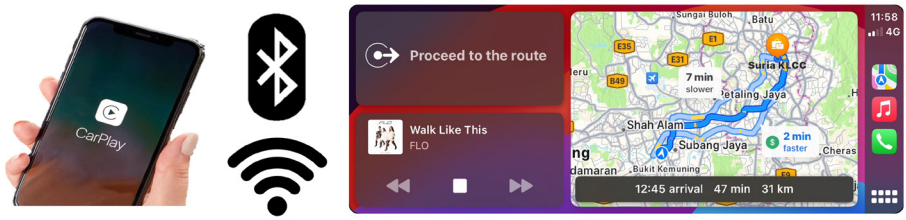

About Apple CarPlay

CarPlay brings the most useful apps from smartphone to vehicle screen of Infotainment Head Unit (IHU) or also known as multimedia unit, optimized for easy glancing and control while driving. With CarPlay you can get turn-by-turn directions, make phone calls, text messages, listen to music and more all from your vehicle screen of IHU.

Basic Requirements

- An iPhone with iOS 5.0 or higher, an active data plan, Wi-Fi support, Bluetooth support and update your phone to the latest iOS version.
- A vehicle Infotainment Head Unit (IHU) that is compatible Apple CarPlay.
- An Apple Lightning to USB cable or a high-quality certified USB cable.
- Siri must be enabled to use Apple CarPlay.

Connect Apple CarPlay | Wireless connection

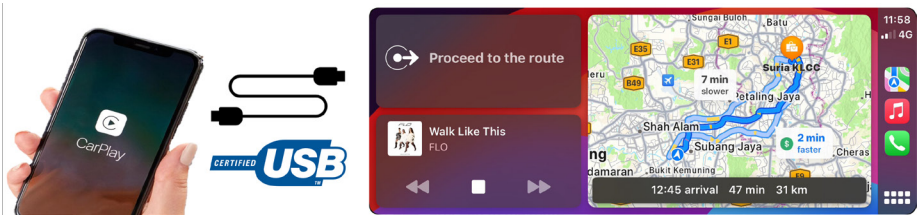

- Keep your iPhone's Siri, Bluetooth, Wi-Fi and Location Services turned ON.
- Ensure your vehicle is in Park (P) and the parking brake is engaged before starting the setup to prevent distractions.
- Ensure the IHU is powered ON, as Apple CarPlay requires the system to be active.

◀

1. For the first-time user, pair your phone with vehicle IHU via Bluetooth.
2. Once your phone is paired with vehicle IHU via Bluetooth, Apple CarPlay should start a few seconds and follow the on-screen prompts to enable Apple CarPlay (you may need to tap Apple CarPlay icon on IHU screen and tap “Allow” on the pop-up notification displayed on your iPhone).

Connect Apple CarPlay | with USB Cable

- Keep your iPhone’s Siri turn ON.
- Ensure your vehicle is in Park (P) and the parking brake is engaged before starting the setup to prevent distractions.
- Ensure the IHU is powered ON, as Apple CarPlay requires the system to be active.

◀

1. Plug the USB cable to your vehicle’s USB Port and plug in the other end into your iPhone.
2. Follow on-screen prompts to enable Apple CarPlay. (You may need to tap Apple CarPlay icon on IHU screen and tap “Allow” on the pop-up notification displayed on your iPhone).

Apple CarPlay | Home Screen

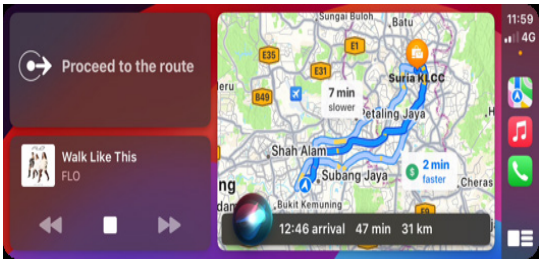

No.	Description
1	Status Area: Signal strength, battery status and time.
2	Recent apps: Most recently used apps
3	App launcher: To access list of all available Apple CarPlay apps, tap on the app launcher icon.
4	Dashboard: Maps navigation and recent places, Call and messages, Music and audio, etc.

Apple CarPlay | Voice Command

- Voice command used in Apple CarPlay is “Siri”.
- Siri can be used to access many of your phone’s functions while driving to enter a destination, send messages and make calls without having to pick up your phone.

Activating “Siri”

1. **Saying Commands**
   - Say “Hey Siri”.
   - The Siri will pop-up on your Apple CarPlay screen, and you will be prompted to say a command.
   - Speak your command clearly.

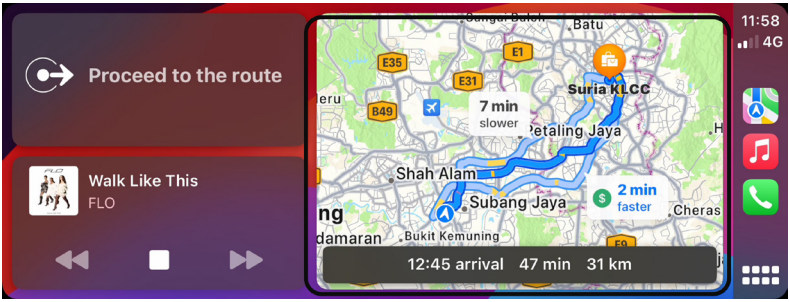

For more information on Siri functionality, visit : https://www.apple.com/ios/siri/ ◀

2. **Steering-Wheel Controls**
   - Press and hold the “Voice Recognition” button on the steering wheel to activate Siri.

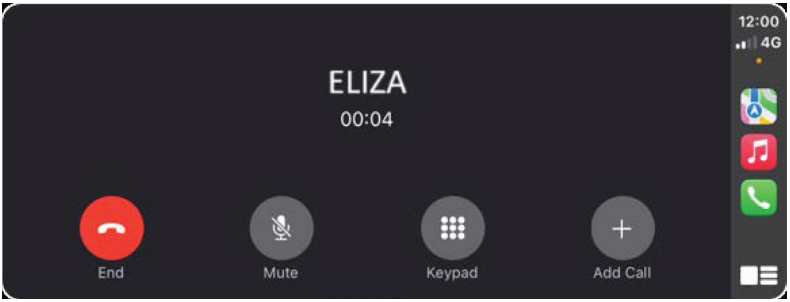

Not all third-party apps support voice recognition through Siri. ◀

Apple CarPlay | Map and Navigation

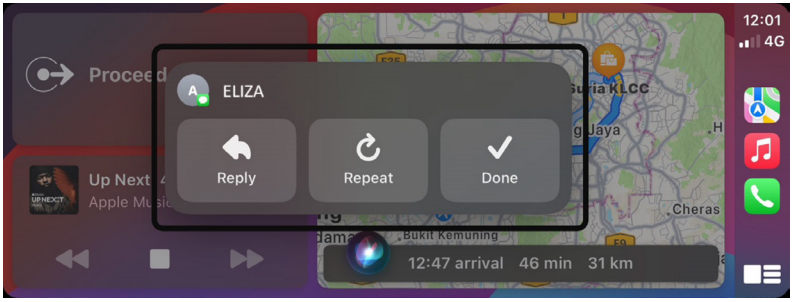

You can navigate using “Apple Maps” or compatible third-party apps such as “Waze”. Provides you voice-guided navigation, estimate arrival times, live traffic information and lane guidance.

Apple CarPlay | Phone Calls

You can make and receive calls with Apple CarPlay. You’ll hear your conversation through your vehicle speakers.

Apple CarPlay | Messages

You can tell Siri to send a text message by voice, read your received text messages and messages from third-party apps (e.g. Whatsapp)

Apple CarPlay | Music and Audio

You can access all your favourite music, podcasts, audiobooks and more are just a command away.

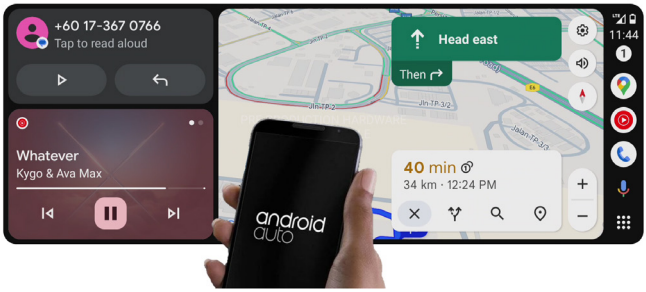

For More Information

- Check your vehicle Owner's Manual for additional instructions.
- Or visit the Apple CarPlay website at https://www.apple.com/ios/carplay/
- You can access all your favourite music, podcasts, audiobooks and more are just a command away.

Notice

- Apple CarPlay is a service provided by Apple, Inc. bounded by their terms and conditions. When using Apple CarPlay, information will be sent from your vehicle (including its position) to the connected iPhone. You will be solely responsible for anyone using the service on your vehicle.
- The Infotainment System (Multimedia unit) only acts as an intermediary interface for accessing iPhone functions.
- Features and behaviors are dependent on the iPhone device, the iOS version, the app, and the media file played.
- While in Apple CarPlay, the Accept Call Button on your steering wheel can only be used to answer incoming calls.
- When using Apple CarPlay, please avoid distraction and use Apple CarPlay responsibly. Stay fully aware of driving conditions and always obey applicable laws.

Android Auto*

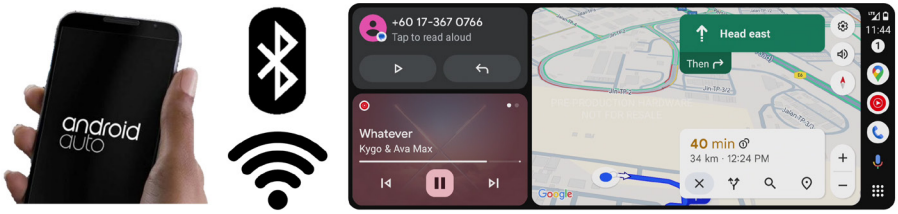

About Android Auto

Android Auto brings the most useful apps from smartphone to vehicle screen of Infotainment Head Unit (IHU) or known as multimedia unit, optimized for easy glancing and control while driving. You will be able to control things like navigation, maps, calls, text messages and music all from your vehicle screen of IHU.

Basic Requirements

- An Android phone with Android 6.0 or higher, an active data plan, Wi-Fi support, Bluetooth support, Android Auto app and update your phone to the latest Android version.
- A vehicle Infotainment Head Unit (IHU) that is compatible Android Auto.
- A high-quality USB cable which certified USB cable for the in-vehicle connection.

Connect Android Auto | Wireless

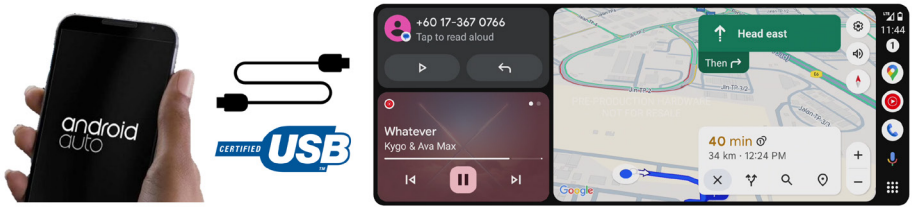

- Keep your phone's Bluetooth, Wi-Fi and Location Services turned ON.
- Ensure your vehicle is in Park (P) and the parking brake is engaged before starting the setup to prevent distractions.
- Ensure the IHU is powered ON, as Android Auto™ requires the system to be active.

◀

1. For the first-time user, pair your phone with vehicle IHU via Bluetooth.
2. Once your phone is paired with vehicle IHU via Bluetooth, Android Auto should start a few seconds and follow the on-screen prompts to enable Android Auto (you may need to tap Android Auto icon on IHU screen).

Connect Android Auto | with USB Cable

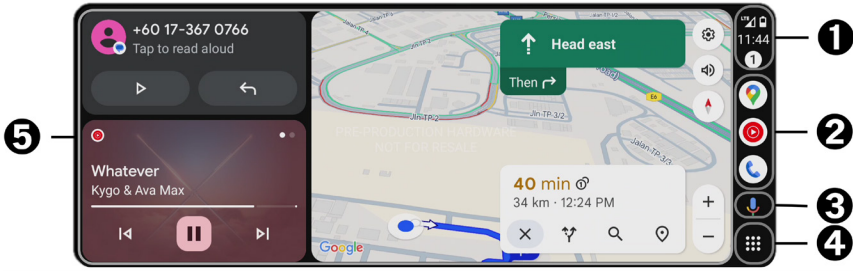

- Ensure your vehicle is in Park (P) and the parking brake is engaged before starting the setup to prevent distractions.
- Ensure the IHU is powered ON, as Android Auto™ requires the system to be active.

◀

1. Plug USB cable in your vehicle's USB port and then plug the other end of the cable into your phone.
2. Follow on-screen prompts to enable Android Auto. (You may need to tap Android Auto icon on IHU screen).

Android Auto | Home Screen

No.	Description
1	Status Area: Signal strength, battery status and time.

5	Dashboard: Maps navigation and recent places, Call and messages, Music and audio, etc.

Android Auto | Voice Command

- Voice command used in Android Auto is “Google Assistant”.
- Google Assistant can be used to access many of your phone’s functions while driving to enter a destination, send messages and make calls without having to pick up your phone.

Activating “Google Assistant”

1. **Saying Commands**
   - Say “Hey Google”.
   - The Google Assistant bar will pop-up on your Android Auto screen, and you will be prompted to say a command.
   - Speak your command clearly.

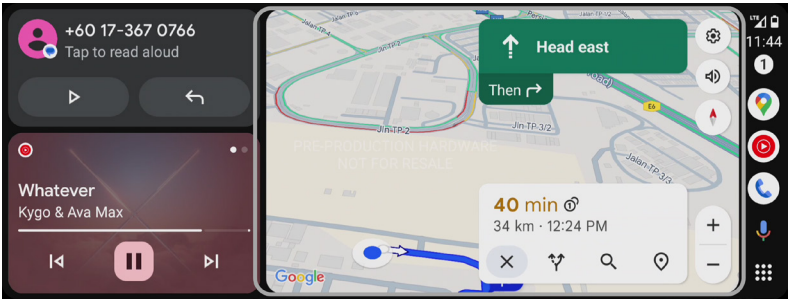

For more information on functionality of the Google Assistant, visit: https://assistant.google.com/platforms/cars/ ◀

2. **Steering-Wheel Controls**
   - Press and hold the “Voice Recognition” button on the steering wheel to activate Google Assistant.

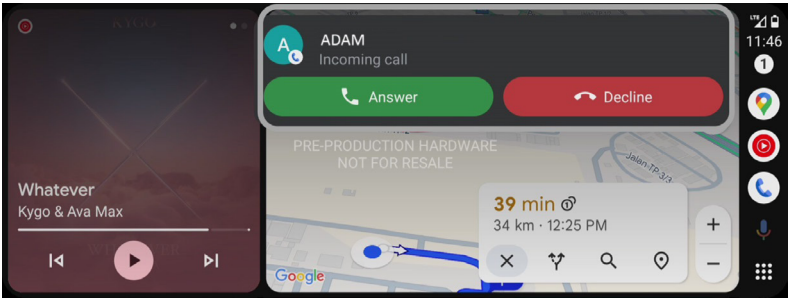

Not all third-party apps support voice recognition through Google Assistant. ◀

Android Auto | Map and Navigation

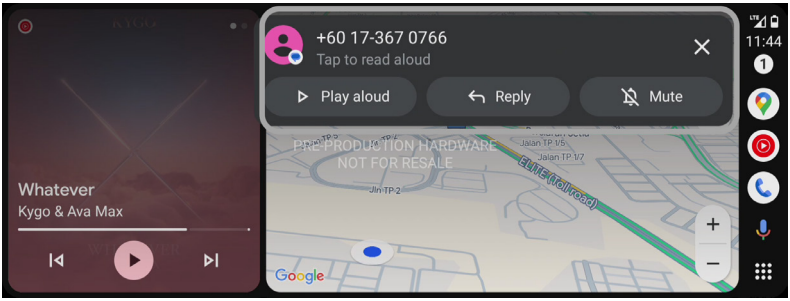

You can navigate using “Google Maps” or compatible third-party apps such as “Waze”. Provides you voice-guided navigation, estimate arrival times, live traffic information and lane guidance.

Android Auto | Phone Calls

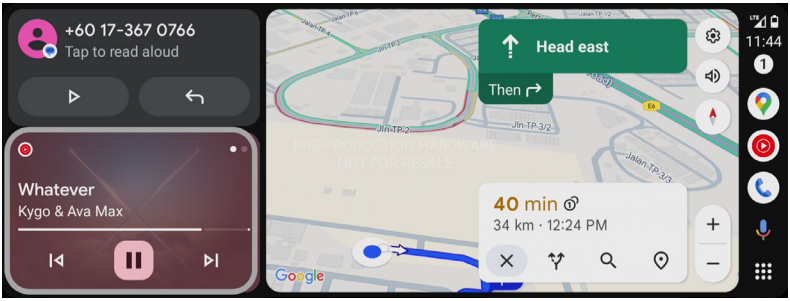

You can make and receive calls with Android Auto. You’ll hear your conversation through your vehicle speakers.

Android Auto | Messages

You can tell Google to send a text message by voice, read your received text messages and messages from third-party apps (e.g. Whatsapp)

Android Auto | Music and Audio

You can access audio entertainment through Google Play Music or compatible third-party music and media apps. (e.g. Spotify, YouTube Music)

For More Information

- Check your vehicle Owner's Manual for additional instructions.
- Or, visit the Android Auto Help Center at https://support.google.com/androidauto/
- For full list of apps compatible with Android Auto, visit https://www.androidauto/auto/

Notice

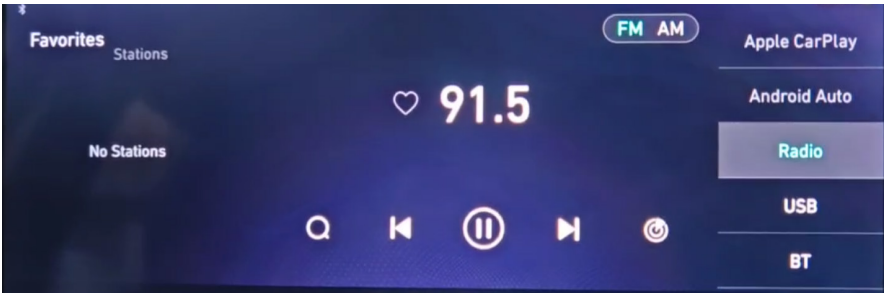

- Android Auto is a service provided by Google LLC, bound by their terms and conditions. When using Android Auto, information will be sent from your vehicle (including its position) to the connected Android device. You will be solely responsible for anyone using the service on your vehicle.
- Google, Android, Google Play, Android Auto and other marks are trademarks of Google LLC.
- The Infotainment System only acts as an intermediary interface for accessing Android device functions.
- Features and behaviors are dependent on the Android device, the OS version, the app, and the media file played.
- When using Android Auto, please avoid distraction and use Android Auto responsibly. Stay fully aware of driving conditions and always obey applicable laws.

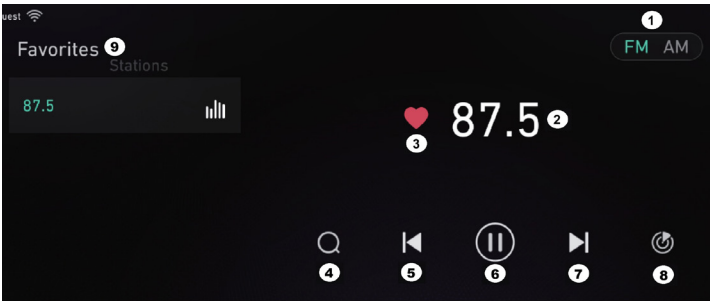

Multimedia

Tap to open **Media app** at homepage or from app list interface to enter the media interface.

Radio

In the media interface, tap ***Radio*** to enter the radio interface to seek and play the preferred radio station.

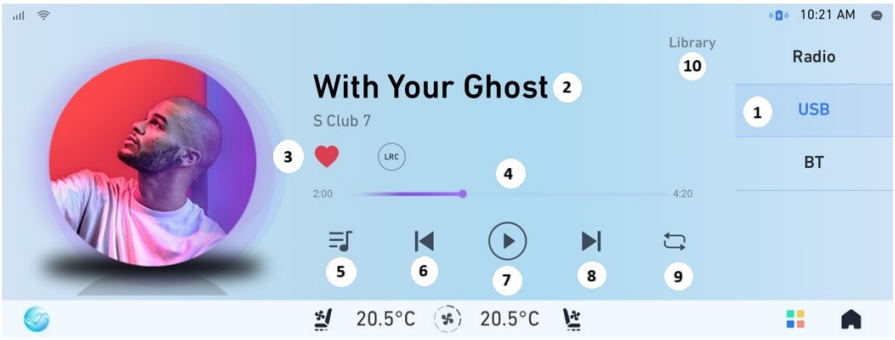

1. Switch between FM and AM radio station.
2. Display the current playing radio station frequency.
3. Adding radio stations to favorites.
4. Search or scan radio stations.
5. Previous radio station : automatically search for the last available radio station.
6. Pause / play radio.
7. Next radio station: automatically search for the nearest frequency radio station.
8. Rebroadcast* : 5 seconds rebroadcasting
9. Favorite list of radio stations.

USB and Bluetooth Music

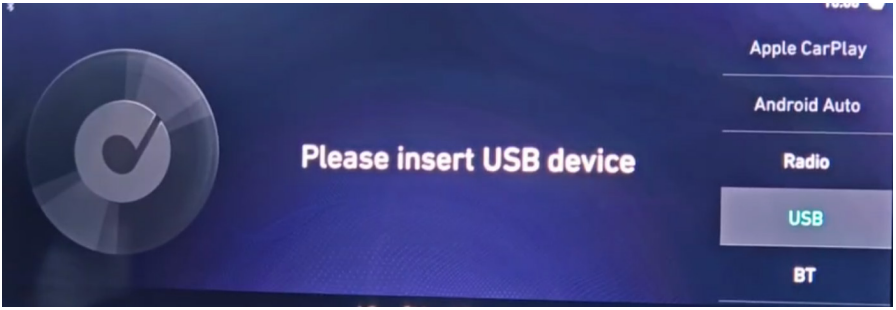

The multimedia unit supports the following audio files formats: MP3, WMA, AAC, WAV, OGG, FLAC. Audio files stored in USB flash drives can be read and played.

USB Music

In the media interface, tap ***USB*** to enter the USB interface to play audio file in the USB flash drive.

1. Tap ***USB*** to enter the USB music interface
2. Display song name, artist name and album name (if available).
3. Add the music to favorites (heart icon in red) or remove music from favourites.
4. Music progress bar displays current played music time and duration. Tap or drag to control the music play.
5. Current playlist or favorites list. Tap to enter.
6. Previous song : automatically search for the last available or played song.
7. Pause / play music.
8. Next song : automatically play the next available song.
9. Play mode : choose between repeat all, single repeat or shuffle.
10. Library : Tap to browse audio files in the USB flash drive.

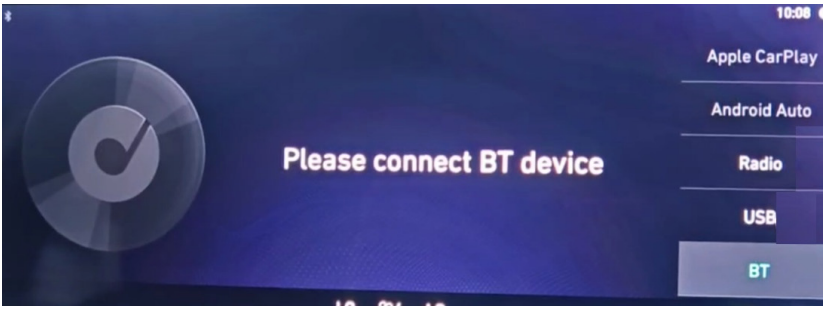

Make sure to connect the USB flash drive to USB port first.

Bluetooth Music

Audio files from a Bluetooth device can be played via Bluetooth connection with the multimedia unit.

In the media interface, tap ***BT*** to enter the bluetooth interface to play audio file in the connected bluetooth media device.

Make sure to pair and connect the bluetooth media device first to play the available music.

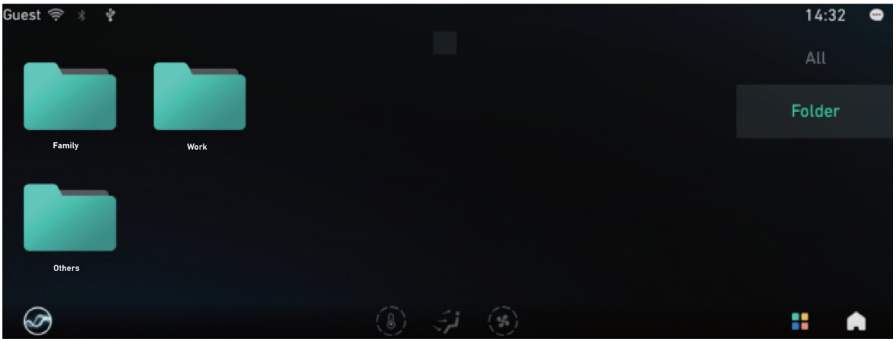

Photos and Videos

Tap **Photo app** or **Video app** at homepage or from the app list interface to browse available photos and videos from local drive and USB flash drive.

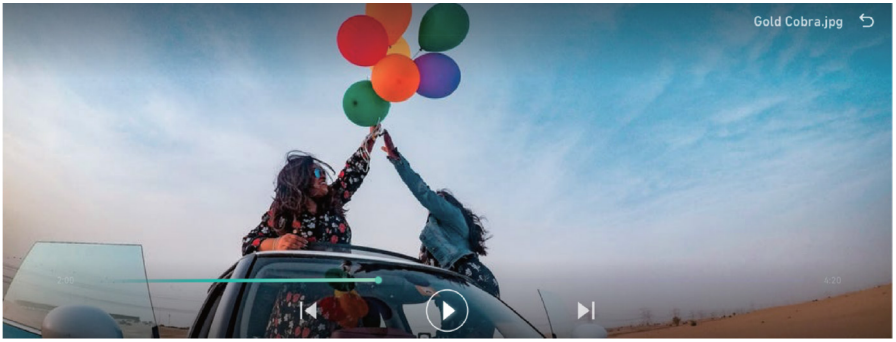

Photo

Multimedia system supports the following image file formats: JPG, JEPG, PNG, GIF (static) and BMP. In GIF format, only for the first image in the truncated GIF image sequence will be displayed.

Photos stored in USB flash drives can also be viewed and displayed from the Photo app. The images will be rearranged according to the respective folders.

Chosen image or video will be displayed in full screen. During the display, there will be an option to go to the previous or next image.

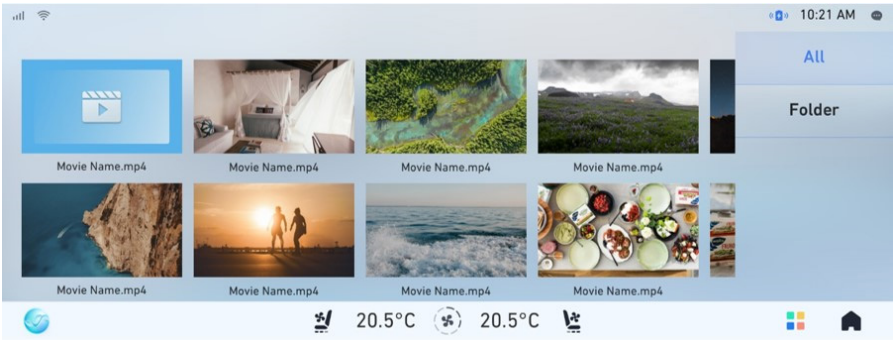

The photos and images files can be transferred between USB flash disk to the local drive of the multimedia unit. Long press on any image will enter to the edit mode. Select the image that need to be transferred and tap ***Send*** to proceed with transferring the images. The images will be able to be viewed from Local drive.

Video

The multimedia unit supports video files in the following formats: 3GP, FLV, MKV, MP4, AVI, MOV.

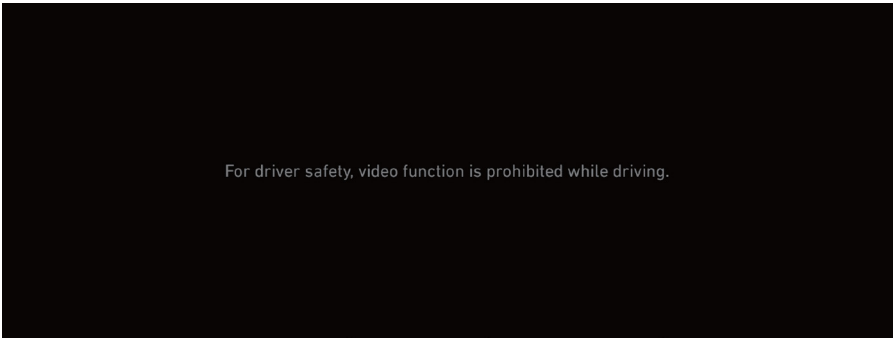

The multimedia unit also supports video files in the following video encoding formats: MPEG, MPEG2, MPEG4, AVC, XVID, MJPEG.

Videos stored in USB flash drives can be viewed and displayed on the multimedia unit.

At Video interface, the chosen video can be played in full screen and non full screen. The file name is displayed on the top right of the screen, next to return button.

During the play, there will be options to go to the previous or next video as well as to play/pause the video play.

Please be aware that the multimedia unit will not allow videos to be played during driving. Hence, a reminder will be displayed if it was found that the vehicle is currently in drive mode.

Theme

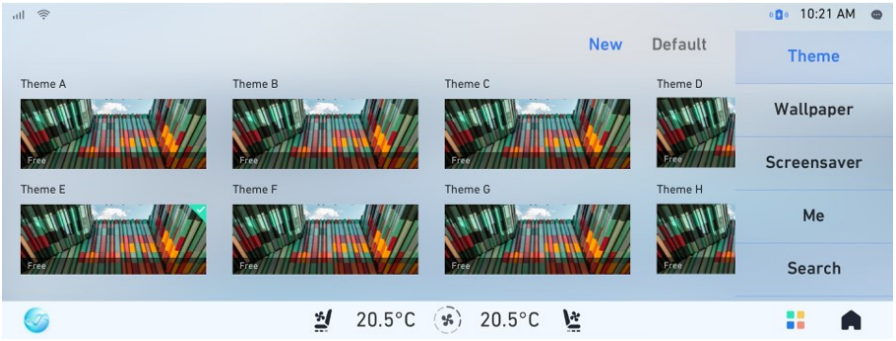

Tap **Theme app** in the App List to enter the interfaces for theme, wallpaper, screensaver, and me (personalized interface).

User can select and change the theme wallpapers in this interface. User can also choose screensaver clocks, which supports displaying digital and analog clock.

Switch Theme

Select **Theme** to open the theme interface.

Choose from a selection of themes and switch between them for more personalization options according to user preferences.

Click on the preferred theme to select and see its details. Download or tap apply to confirm the selection.

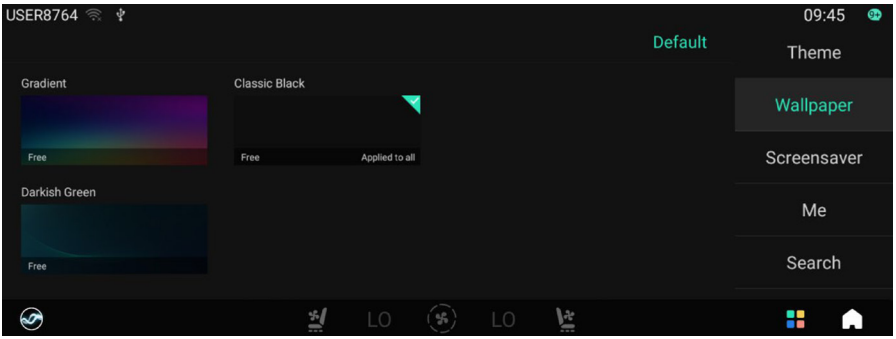

Once confirmed, the apply button will dim and the word will change to applied, indicating that the selection has been set as current theme for multimedia unit screen display.

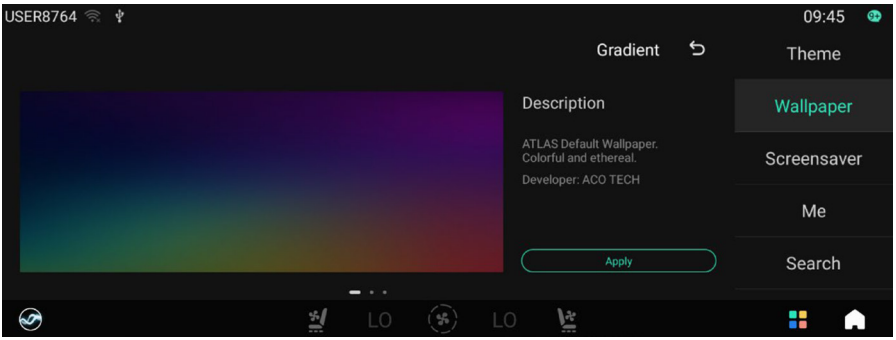

Switch Wallpaper

Select **Wallpaper** to open wallpaper interface.

Choose from the selected wallpapers and switch more personalized options between them according on user preferences.

Click on the preferred wallpaper to select and see its details. Click apply and confirm the selection to switch the wallpaper.

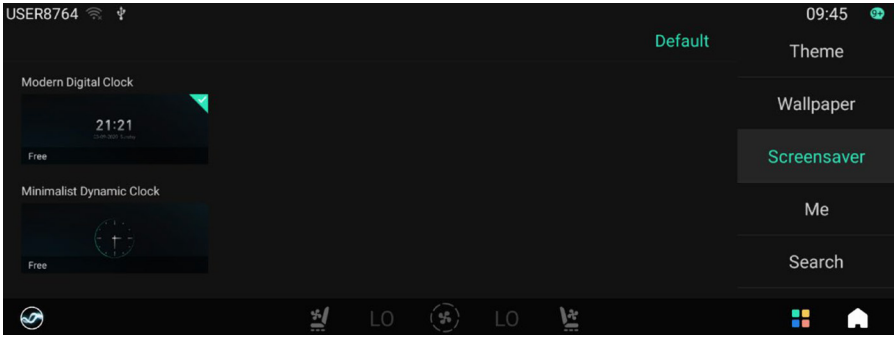

Once confirmed, the apply button will dim and the word will change to applied, indicating that the selection has been set as current home page background.

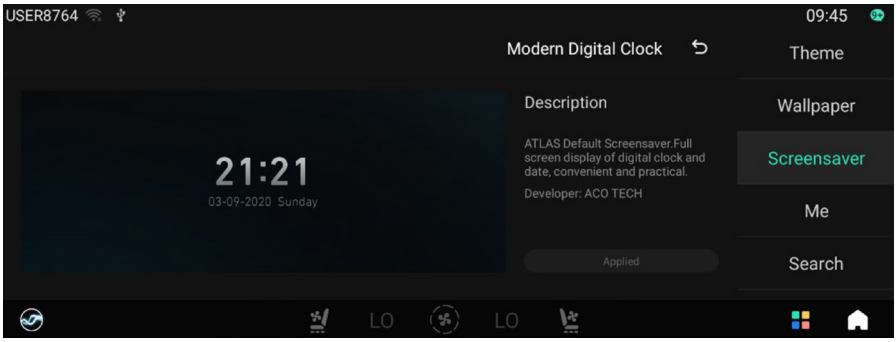

Switch Screensaver

Select **Screensaver** to open screensaver interface.

Switch to preferred screen saver and set screensaver for the screen lock page.

Click on the preferred screensaver to select and see its details. Click apply and confirm the selection to switch the screensaver. System will download and apply the selected screensaver clock.

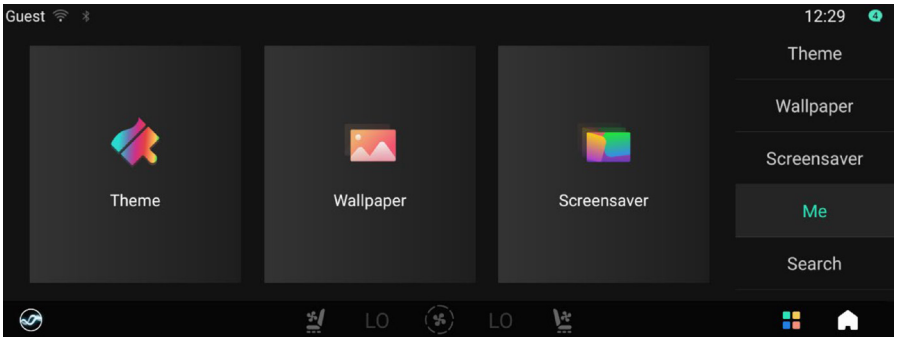

Once confirmed, the apply button will dim and the word will change to applied, indicating that the selection has been set as current pattern when locking the screen.

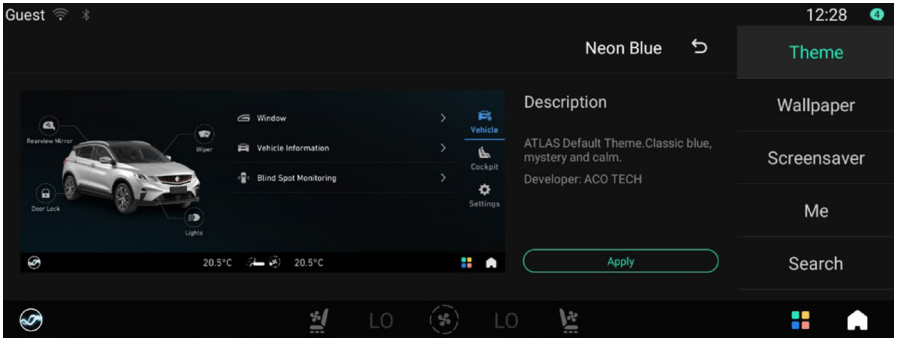

Me

Select **Me** to enter user personalized (Me) interface.

The Me interface supports classification by “Theme”, “Wallpaper”, and “Screensaver” to view, edit and delete the content that currently has been downloaded or purchased on the vehicle multimedia unit.

For example, click on the theme folder to select the preferred theme and see its details.

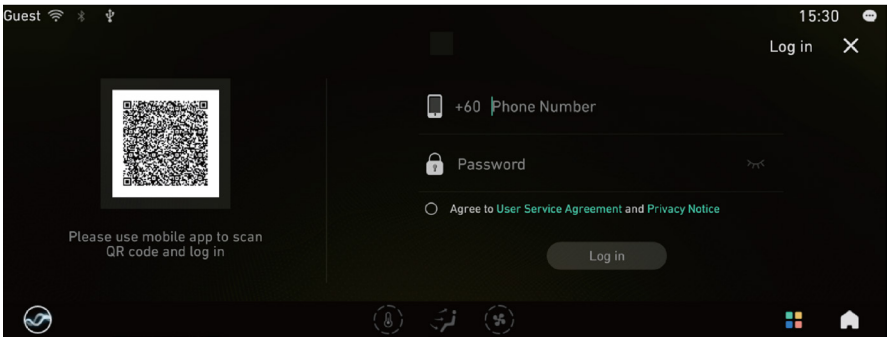

Refer to the respective switching step if user wish to change and further personalized the theme, wallpaper, or screensaver. Click apply to confirm the new selection.

Member Center*

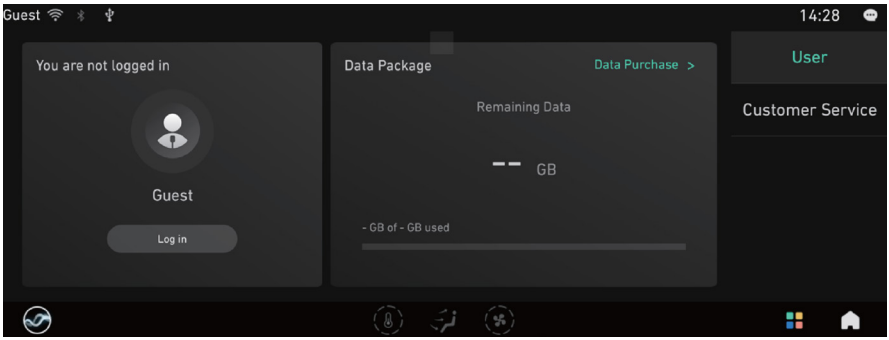

The ***Member Center app*** offers easy access to vehicle information and user account management. It features a variety of services that create a seamless driving experience.

The user can access the Member Center using a guest account or by logging in with phone number and password.

Account Login

User can log in to member account by scanning the QR code or entering the phone number and password in the Member Center interface.

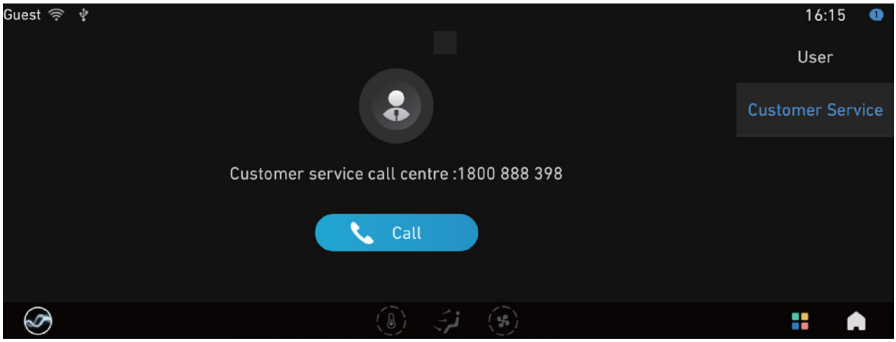

The PROTON Link application with the associated account linked to the vehicle upon purchase can also be used to scan the QR code displayed on the multimedia unit to login.

After logging in, users can view their account information such as Nickname and Profile Picture. Internet data and purchased data can also be viewed in the Member Center.

Customer Service
